

# DARE TO COMPARE

## MAXWELL vs. FRANKEN-SYSTEM

A problem has been detected and windows has been shut down to prevent damage to your computer.  
If this is the first time you've seen this stop error screen, restart your computer. If this screen appears again, follow these steps:  
Check to make sure any new hardware or software is properly installed. If you are not sure whether you have added new hardware or software, you can remove the recently added hardware or software. Turn off your computer, wait one minute, and then turn on your computer. If the screen reappears, repeat these steps.  
Disable or remove any newly installed hardware or software. Disable or remove any recently added memory modules. Restart your computer.  
If you are unable to perform the steps listed in this message, contact your hardware manufacturer for more information on this error code.

# Are You Under the Attack of **FRANKEN-SYSTEM?**

Your bottom line may be under attack. Working with a crude mash-up of different software packages from different companies can threaten your success and crush your cash flow.

## Monstrous Problems You Have:

- Duplicate data entry
- Multiple databases
- Numerous servers
- Import/Export lifestyle
- Various vendors
- Version incompatibility
- Several support contracts

## Constant Questions & Headaches:

- Which information is accurate?
- Where do I find the documents I need?
- How did we lose money on that project?
- Is that the true cost?
- Should that have been a change order?
- Which support provider do I call with a problem?
- Is this the project that will break me?

# Protect Your Projects With **ProContractorMX<sup>®</sup> Software!**
